

REMARKS

In reviewing the claims during preparation of the Appeal Brief, Applicant noted an inadvertent transcription error in claim 25 (namely, the lower end of the range of the recited acoustic absorption coefficient is 0.50, rather than 0). Accordingly, the foregoing amendment is presented, and entry is respectfully requested to place claim 25 in better form for purposes of appeal. No new matter is added. Any fees required in connection with this Amendment may be debited to Deposit Account 50-0568.

Respectfully submitted,

OWENS CORNING
